Temple.

5 Sep 1869

Dear Sir

So far as I know  
the Rhodocoraki Story is  
a pure myth, I have not  
had the time to look it  
up; I have omitted to  
write to Barker for his au-  
thority. After the destruction  
of the Cahiri line (the four-  
nays) the Empire was  
renewed in the Greek line

Tuesday dates the destruction  
of the Roman Empire  
with the taking of ~~loose~~ by  
the Crusaders & its division  
*part hertia et divisione*  
etc. The next he calls the  
Latin rule & says that <sup>not</sup> until  
<sup>after</sup> the destruction of this was it  
properly a Greek Empire

Now the last family was  
that of Constantine Paleo-  
logos. who died in the church  
in May 1453. when the  
Ottoman Turks took the city

This descendant have  
been long settled in the  
Paleologs, though I have  
met many who claimed  
to be descended from them  
much I suspect as very  
well known is descended  
from a well King - #

Now the Chodokonakis  
are Secos! There is a now  
candle house in London  
of that name - It means  
Rose house قوناق و قوناق  
Konak. a lodging - Red house

eye sent le just deloisi.

Now I never heard of Rhod<sup>os</sup>  
conake Castle at Chios.

It was the Island to which  
under the early X<sup>th</sup> Empire  
Jews returned, <sup>from Greece</sup> having made  
their fortunes or rather  
become sleeping part-  
ners with their sons &  
successors, for the Jews  
were then what they are  
now the parasites of  
Society - In 566 about  
Justinian the most ortho-  
dose of Emperors issued

The Edict de Tolerance given  
Manchester & other heretics  
publicly pros under grace  
commercial disabilities  
which induced them as in  
Spain to conform outward  
ly at least to the King & ulti-  
mately they actually con-  
formed, but still remained  
Jews, intermarrying &  
carrying on Jewish trades  
& general trade. Palli  
Londres, indeed nearly  
all in London & Manchester

are Christ Greeks, alias  
Jews & the type is so strong  
that no one can doubt it  
for a moment - Their prin-  
cipal trade is corn, in fact  
they export grain  
For these men to sit up  
w<sup>th</sup> descendants of the  
Paleologs is just too absurd  
Some merchant none  
things & praise request  
another. I treat the whole as  
absurd at present, but

perhaps Gardner would  
give you his authority for  
this astounding paragraph  
I have not seen the only  
Greek I know here, who is  
at once a scholar and  
not a Christian (whom it is  
said it takes 3 Jews to make  
a Jew and 3 Gentiles to  
make a Christian) the  
famous Stephanos Xenos  
who certainly will have  
heard of the myth

This address in Reform  
Club & he would have  
pleasure in enlightening  
you, it was he who first  
drew my attention to the  
Error & explained it

At present I say credit  
Juvens Epilla non ego.  
but it is worth enquiring  
evidence would of  
course convince me

In ever  
Holycrow
