

My dear Sir & Brother,

Many thanks for your kind letter & I have written in extenso the History of our Order from various sources you visited & Mr. I have divided it in 5 parts - The first part containing the History of the Order from its foundation to the present time - The second, a description of the habit of the Grand crosses, Knights &c. - The third the ceremony on the creation of a Knight by the Grand Master & the Deacons - The fourth, the Statutes of the Order, as written originally and used until now, & the fifth, a Chronological list of all the Grand Masters. The greater part of the above is now in the possession of Bro. Yorker & Master to whom the synopsis is soon as they have done with it I shall send it to you for approval - I intend to day my London engraver to engrave a plate with the Insignia &c. &c. of the Order in order to insert it in the "Miscellaneous Genealogy, &c. &c. &c." as a supplement to the genealogy - If possible I would like better if it would be published in a periodical & then reprinted if necessary to accompany my genealogy, but I do not know of any periodical which would print such a long treatise on an occasion - I shall be obliged if you could lend me for perusal the periodical in which the sketch of Mr. Little about our Order was printed - I asked many lawyers in London if I could proceed against him - All told me that I cannot, but were it I could it would be better to ignore its existence and try to put it down without going in a court of justice - I have written a protest

to the S. G. C. 33rd for England against the male - Comber's
Principles told me that it was decided at the last meeting
that they will never recognize us, but that they forgot
to pass the resolution in their minute book - He
promised this to be done in May. - I thought
publishing my protest in the Templar Magazine
together with Comber's Principles. But I was advised
to await until the decision of the Council is passed
in their minute, and publish that decision together
with my protest.

Believe me to remain with fraternal
regards and esteem
Yours most sincerely
Rhodanakis
